Brodrene Hartmann A/S

March 2024

## I. Introduction

Brodrene Hartmann has since the construction of our first production plant in 1936, produced our moulded-fibre packaging from recycled raw materials, and circularity has always been the very foundation of our business model. The sustainable profile of our products has been a key competitive strength and a growth driver for years. We continuously strive to improve our processes and ensure that our products will remain the most sustainable packaging solution going forward – and we are therefore stepping up our efforts to identify opportunities, accelerate improvement initiatives and report on our progress and challenges.

The company is committed to UN Global Compact and its principles, which we will continue to support in the future. Simultaneously, we are committed to support the UN Sustainable Development Goals with a particular focus on six selected goals that we are particularly well-positioned to contribute to due to the nature of our business activities.

I look forward to the journey ahead and aim to continuously evolve and improve our approach, welcoming any feedback from our talented employees or other stakeholders.

Sincerely,

Torben Rosenkrantz-Theil, CEO
