

Corporate Charter

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Dear Customer,

For more than 100 years, recycled paper - a biodegradable material - has always been the primary raw material for our moulded fibre packaging at Hartmann.

Our production process requires energy for drying and handling the formed material, and we are strongly committed to reducing our CO₂e emissions steered by our commitment to the Science-Based Target initiative (SBTi).

As we align with the Science-Based Target initiative (SBTi), our intensified focus on reducing carbon emissions goes hand in hand with our profound commitment to environmental stewardship, human rights, and workplace safety. We have also embarked on a comprehensive journey to assess our impact across the entire value chain, aiming to extend our high safety standards and improve our social impact.

On the next page you will find an overview of our certifications and the principles we adhere to.

Torben Rosenkrantz-Theil

CEO
Hartmann Packaging A/S

Corporate Charter

This document includes basic information about Hartmann Group management systems, statements and company standards.
